About me

I am a passionate and motivated software engineering student at the University of Colombo School of Computing, aspiring to become a skilled full-stack software developer. I enjoy turning ideas into real-world solutions and continuously learning new technologies to expand my capabilities. I have worked on several personal and academic projects, as well as two industrial-level projects that enhanced my understanding of real-world software development practices. I am driven by a strong interest in building efficient, user-friendly applications—whether it's front-end interfaces or robust back-end systems. My goal is to become a versatile developer who can contribute meaningfully across the entire development life cycle.
